EDUCATION

Florida Atlantic University

Boca Raton, FL

Bachelor of Science in Computer Science

August 2021

Relevant Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, Principles of Software Engineering, Mobile Applications, Database Structures, Computer Operating Systems.

SKILLS

C++, Python, MATLAB, Java, JavaScript, HTML, CSS, MySQL, Firebase and Bootstrap.

Fluent in the written and oral communication of Haitian Creole.

ACADEMIC PROJECTS

Material Handling Robot (Jan 2021 – Aug 2021): Developed a robot application alongside 3 software engineers for Florida Power & Light Company's inventory robot. Programmed exception handling, docking, and dispatching algorithms using Python to improve the robot's efficiency when performing task.

Pyradise (Aug 2020 - Dec 2020): Lead 5 software engineers in creating a web-based application that gave users access to Python programming tutorials ranging from beginning to advanced level topics. The application included interview preparation, full python courses, a comment section and feedback system.

PERSONAL PROJECTS

Coding is fun: Developed a website that informed users about programming using JavaScript, HTML, CSS, and Bootstrap. The website included a reason to code, a selection of programming languages and how to get started.

Flop: Developed a side scrolling mobile tap game with React Native. The user controls an object while attempting to float through columns without interference.
